Here's a link:

https://gracious-thirsty-kepler.cidemo.co/

Please ignore the generic URL, if I tried a different domain, hosting gave me trouble…

Play button is not super responsive at first, so... maybe give it a second. (Think it's just the loading of audio files). Controls populate after pressing play (to init AudioContext).

I gotta get better at making sure I'm hosting things correctly but... I think this should work.

Uploading files here just in case I messed up the hosting.
